

City & Guilds
3668- 03

No Prerequisites Required

Course Description

Learners will be introduced to the scope and opportunities offered within the network infrastructure (communications cabling) and telecoms industry. This qualification will cover communications cabling processes and principles including safe working practices and telecom behaviours. Learners will gain an insight into the communications cabling industry, including an understanding of the range of services offered, the terminology used and the health, safety and environmental rules and regulations. Learners will be introduced to the principles of communications cabling systems and supporting network infrastructure. Learners will develop skills on how to install, e.g. fibre optic, copper and/or air blown fibre cables and micro-ducts.

Cost & Duration
