

## N33 Cabling Underground Overblow

**Prerequisites  
Required:  
SA002 & K9**

### Course Description

This is a technique to install, by blowing techniques, a single small diameter fibre cable over an existing legacy fibre cable that is already present in a sub-duct Mono-bore.

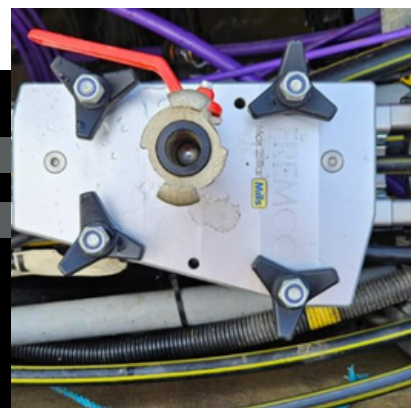

This installation requires the use of a specialised blowing head and associated blowing equipment.

### Duration

1 Day

### Cost

**£181.50 + VAT**
